I liked the suggestions on the slides and also the links for further information. They are very usefull for the future.

I recommend the class for „beginners" of a PhD. For „advanced" PhD I would recommend some parts of the class.

Thank you for your feedback.

In my opinion, it would be nice to analyze a whole paper (or a couple of them) in order to know what things to do and other things to avoid. A comparison between a good-structured and, good-written paper and an "improvable" one would be very interesting.

Psychological insights on how to be more productive were really helpful. In my opinion, it would be nice to put even more focus on that.

The first day was long and I prefer if the lecture does not last more than 6 hours.
The course could be splited to 3 days instead of 2.
I would like to thank you for what you teach us.

Best regards

◆ Add some explanation (& review) on the different types of Sentences
- Simple
- Complex
- Compound.
And then, introducing the punciuation punciuation part.

◆ Design 1-2 group disscussion or group work modules.
eg.on learning examples. In my opinion,
the numble of examples (exercises) is a little bit more. By
group work we can distribute these exercises into groups.

◆ I like the part of investigating the needs of different attendees.

Thank you for your feedback.

We all have a engeneering background and are in the same field. Maby it might be helpful if the presentor speaks with someone from the field who can write (e.g. Mr. Hipke) to check the teached things if it fits to an engeneering background. Sometimes I was a bit confused if it is a fact for all or if I have to check it with my superviser.
