Further remarks...
Focus <u>more</u> on what to expect in our career.
Prepare us to handle situations that may arise when people from different disciplines meet.
The group exercises were really helpful to practice and it's really good to have first group exercises then followed with the theoretical content.
It was way more about research in general. Not about the interdisciplinary projects.
Every aspect of course was well-designed and was very worthwhile in a way that everyone would have a chance to speak openly in a highly engaged manner.
It would be better to shorten the interactive parts and/or "mix the theoretical input".
A lot of things were repeated.
