5. Further remarks... For additional online formats, I would like...

5.1)

- I would like to get some reading material before the commencement of the workshop so that I can be better prepared for group discussions.
- Less reading sessions, this was not productive. I do not need an online course to read an document for 1h

6. Which topics in the scope of the qualification program do you consider to be important/ interesting?

6.1)

- 1) Different aspects of scientific practice (ethics, data collection, publication, etc)
2) Prevention of scientific misconduct
- I learned most during the section "authorship". It was very helpful for me.
