5. Further remarks… For additional online formats, I would like...

5.1)

- I would prefer more diverse learning formats. We just had group discussion in plenum and individual work. Group work in breakout rooms would be nice for example.
- More structure in the course and less surprises: sharing slides at the beginning of the course, mention the tasks format from the beginning, defining the goal of the workshop clearly

6. Which topics in the scope of the qualification program do you consider to be important/ interesting?

6.1)

- * how to deal with conflicts during collaboration
  * how to arrange collaboration with different institutes
  * more writing courses
  * tricks for preparing large-scale conferences
- Scientific writing in general is vital, from the 6 phases presented, planning and pre-writing were highlighted, which are both interesting and important.
  However, tips for translation would be also interesting and important, it was given only at the end of the workshop very shortly.
